Federal Judge Dole opened the spe-cial February term of the United States District Court at 11 o'clock this morning

U. S. District Attorney R. W. Breckons announced that he had been in-formed that two defends under the charge of conspiring to violate Federal moral statutes, fostering prostitu-

tion, desired to change their pleas..

Two Japanese stepped forward and stated that they wished to plead guil-

ty.

Breckons asked that the matter of sentence go over a couple of weeks to allow the defendants to wind up their business matters. Attorney John W. Catheart, appearing for the pair, said the Japanese had changed their pleas without consulting him.

Cathcart believed there was still another Japanese, Ohuki, who contem plated changing his plea and asked that Ohuki be called. Ohuki was called and said, "Yes; he had paid ten dollars," and that he pleaded guilty. His sentence was also reserved.

"Paying ten dollars" is a failing pe culiar to members of the Japanese secret society for the prevention of prosecution of crime, the payment to the club constitution membership.

The Old Ready-Made The New Ready To-Wear Before the advent of ALFRED BENJAMIN & CO. 30 years ago there were more old ready made clothes than any other kind. The fabrics were inferior; the designs were commonplace: the pieces were thrown together with cheap cotton thread; the whole garment had a hang-dog look that no amount of pressing could get rid of. What little shape it first had was soon lost At a glance you could tell this ready-made from custom-made—just as you can now. When BENJAMIN Clothes were first marketed the other fellows shook their heads and predicted failure. "Where is the profit," they asked "in retailing garments that cost as much to tailor as custom-made?" Thirty years of sucducing fine clothes at reasonable Today the highest type of ready-for-service apparel bears this famous trade-mark. The Kash Co Ld.

The foot with a bunion was very much like other feet before the bunion grew. It needs a shoe having more room in certain points, but in others no extra room is required. It has been impossible to obtain a satisfactory fit in a ready made shoe. The nearest approach to it was obtained by buying a shoe which was two or three sizes too long or two wide in order to give the room. Such a shoe felt easy when first worn, but after a time it began to hurt—why? Because it was much too large in instep and heel and allowed the foot to crowd forward into the shoe, cramping ond otherwise hurting the toes and joints already tender and inflamed. The "Bunion Shee" is the only shoe in world that will fit the foot with a bunion or an enlarged joint.
